Receive investor materials electronically:

Shareholders may sign up for electronic delivery of investor materials. By doing so, you will receive the information faster and help us reduce the impact on the environment of providing these materials. To enroll in electronic delivery,

- 1. Go to www.icsdelivery.com
- 2. Select the first letter of your brokerage firm's name.
- 3. From the list that follows, select your brokerage firm. If your brokerage firm is not listed, electronic delivery may not be available. Please contact your brokerage firm.
- 4. Complete the information requested, including the e-mail address where you would like to receive notifications for electronic documents.

Your information will be kept confidential and will not be used for any purpose other than electronic delivery. If you change your mind, you can cancel electronic delivery at any time and revert to physical delivery of your materials. Just go to www.icsdelivery.com, perform the first three steps above, and follow the instructions for cancelling electronic delivery. If you have any questions, please contact your brokerage firm.

	,906) 9,125)	_ 1/26/2026	UBS AG	(4.73)%	Bricks and Mortar Retail Store Index	(81,708) (120,232)	_	76,671	(5,037)
	-, -,	=			Total Unrealized Appreciation	419			
					Total Unrealized Depreciation	(120,651)			

- a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.
- b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.
- c Reflects the floating financing rate, as of May 31, 2025, on the notional amount of the swap agreement paid to the counterparty or received from the counterparty, excluding any commissions. This amount is included as part of the unrealized appreciation/(depreciation).
- d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.
- e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.

- a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.
- b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.
- c Reflects the floating financing rate, as of May 31, 2025, on the notional amount of the swap agreement paid to the counterparty or received from the counterparty, excluding any commissions. This amount is included as part of the unrealized appreciation/(depreciation).
- d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.
- e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.
- f In order to facilitate the daily valuation of these swap transactions as of close of business New York time, one or more financial products traded on a U.S. exchange are used as the reference entity as a surrogate for the respective underlying index for the purposes of both daily valuation calculation as well as final settlement of the swap.

- Value determined using significant unobservable inputs and is reported as a Level 3 security in the valuation hierarchy table located in Note 2 in Notes to the Financial Statements.
- (a) Securities exempt from registration under Rule 144A or section 4(2), of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the investment adviser and may be resold, normally to qualified institutional buyers in transactions exempt from registration. The aggregate value of these securities as of May 31, 2025 was \$143,160,220 which represents 85.60% of net assets.
- (b) Step bond. Interest rate is a fixed rate for an initial period that either resets at a specific date or may reset in the future at a contingent upon predetermined trigger. The interest rate shown was the current rate as of May 31, 2025.
- (c) The security or a portion of this security is on loan at May 31, 2025. The total value of securities on loan at May 31, 2025 was \$2,983,076, collateralized in the form of cash with a value of \$3,045,463 that was reinvested in the securities shown in the Securities Lending Reinvestment section of the Schedule of Portfolio Investments and \$66,033 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.00% 4.63%, and maturity dates ranging from June 26, 2025 February 15, 2052. The total value of collateral is \$3,111,496.
- (d) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown is the rate in effect as of May 31, 2025.
- (e) The security was purchased with cash collateral held from securities on loan at May 31, 2025. The total value of securities purchased was \$3,045,463.
- (f) Rate shown is the 7-day yield as of May 31, 2025.
- (g) The Fund invests in Repurchase Agreements jointly with other funds in the Trust. See "Repurchase Agreements" in the Notes to Financial Statements to view the details of each individual agreement and counterparty as well as a description of the securities subject to repurchase.

- a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.
- b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.
- c Reflects the floating financing rate, as of May 31, 2025, on the notional amount of the swap agreement paid to the counterparty or received from the counterparty, excluding any commissions. This amount is included as part of the unrealized appreciation/(depreciation).
- d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.
- e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.
- f Certain underlying component disclosures related to this index may be found on the website at www.proshares.com/globalassets/proshares/documents/resources/ FTSE_30_Year_TIPS_May.pdf.

- a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.
- b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.
- c Reflects the floating financing rate, as of May 31, 2025, on the notional amount of the swap agreement paid to the counterparty or received from the counterparty, excluding any commissions. This amount is included as part of the unrealized appreciation/(depreciation).
- d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.
- e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.
- f Certain underlying short component disclosures related to this index may be found on the website at www.proshares.com/globalassets/proshares/documents/resources/Large_Cap_Short_May.pdf
- g See the Common Stocks section of the preceding Schedule of Portfolio Investments for the representative long components of the underlying reference instrument and their relative weightings.

a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.

b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.

c Reflects the floating financing rate, as of May 31, 2025, on the notional amount of the swap agreement paid to the counterparty or received from the counterparty, excluding any commissions. This amount is included as part of the unrealized appreciation/(depreciation).

d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.

e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.

The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on forward currency contracts) at period end as an asset on its Statements of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on forward currency contracts) are disclosed as a liability on its Statements of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statements of Assets and Liabilities.

b The Net Amount of the Fund's uncollateralized exposure to the counterparty under these contracts is equal to the net unrealized appreciation, if any. Neither the Fund nor the counterparty has posted Financial Instruments or cash as collateral pursuant to these contracts.

ETF IQQQ ::

Value and

- (c) The security was purchased with cash collateral held from securities on loan at May 31, 2025. The total value of securities purchased was \$157,162.
- (d) Rate shown is the 7-day yield as of May 31, 2025.
- (e) The Fund invests in Repurchase Agreements jointly with other funds in the Trust. See "Repurchase Agreements" in the Notes to Financial Statements to view the details of each individual agreement and counterparty as well as a description of the securities subject to repurchase.

As of May 31, 2025, the gross unrealized appreciation (depreciation) of investments based on the aggregate cost of investment securities and derivative instruments, if applicable, for federal income tax purposes was as follows:

Aggregate gross unrealized appreciation	\$ 14,907,019
Aggregate gross unrealized depreciation	 (9,852,006)
Net unrealized appreciation	\$ 5,055,013
Federal income tax cost	\$ 144,748,943

Abbreviations

ADR American Depositary Receipt

Futures Contracts Purchased

Nasdaq-100 High Income ETF had the following open long futures contracts as of May 31, 2025:

Swap Agreements^a

Nasdaq-100 High Income ETF had the following open non-exchange traded total return swap agreements as of May 31, 2025:

Notional Amount (\$)	Termination Date ^b	Counterparty	Rate Paid (Received)°	Reference Instrument	Value and Unrealized Depreciation ^d (\$)	Financial Instruments for the Benefit of (the Fund)/the Counterparty (\$)	Cash Collateral for the Benefit of (the Fund)/the Counterparty (\$)	Net Amount° (\$)
		Goldman Sachs		Nasdaq-100 Daily			· ·	
149,589,926	11/6/2025	International	N/A	Covered Call Index	(4,468,681)	4,468,681	_	_
149,589,926					(4,468,681)			
				Total Unrealized				
				Depreciation	(4,468,681)			

- a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.
- b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.
- c No financing fee is paid or received on this swap.
- d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.
- e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.

- * Non-income producing security.
- (a) All or a portion of these securities are segregated in connection with obligations for swaps with a total value of \$8,976,399.
- (b) The security or a portion of this security is on loan at May 31, 2025. The total value of securities on loan at May 31, 2025 was \$1,069,459, collateralized in the form of cash with a value of \$973,830 that was reinvested in the securities shown in the Securities Lending Reinvestment section of the Schedule of Portfolio Investments and \$187,652 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.00% 6.13%, and maturity dates ranging from June 5, 2025 November 15, 2054. The total value of collateral is \$1,161,482.
- (c) Security exempt from registration pursuant to Regulation S under the Securities Act of 1933. Regulation S applies to securities offerings that are made outside of the United States and do not involve direct selling efforts in the United States and as such may have restrictions on resale.
- (d) Represents less than 0.05% of net assets.
- (e) The security was purchased with cash collateral held from securities on loan at May 31, 2025. The total value of securities purchased was \$973,830.
- (f) Rate shown is the 7-day yield as of May 31, 2025.
- (g) The Fund invests in Repurchase Agreements jointly with other funds in the Trust. See "Repurchase Agreements" in the Notes to Financial Statements to view the details of each individual agreement and counterparty as well as a description of the securities subject to repurchase.

Swap Agreements^a

Russell 2000 High Income ETF had the following open non-exchange traded total return swap agreements as of May 31, 2025:

Notional Amount (\$)	Termination Date ^b	Counterparty	Rate Paid (Received)°	Reference Instrument	Value and Unrealized Depreciation ^d (\$)	Financial Instruments for the Benefit of (the Fund)/the Counterparty (\$)	for the Benefit of (the Fund)/the Counterparty (\$)	Net Amount° (\$)
		Goldman Sachs		Russell 2000® Daily				
44,629,264	4/6/2027	International	N/A	Covered Call Index	(702,894)	_	702,894	_
44,629,264	_				(702,894)			
	-			Total Unrealized				
				Depreciation	(702,894)			

a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.

b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.

c No financing fee is paid or received on this swap.

d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.

e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.

- Non-income producing security.
- (a) All or a portion of these securities are segregated in connection with obligations for swaps with a total value of \$249,561,850.
- Represents less than 0.05% of net assets.
- The Fund invests in Repurchase Agreements jointly with other funds in the Trust. See "Repurchase Agreements" in the Notes to Financial Statements to view the details of each individual agreement and counterparty as well as a description of the securities subject to repurchase.

Abbreviations

Real Estate Investment Trust REIT

As of May 31, 2025, the gross unrealized appreciation (depreciation) of investments based on the aggregate cost of investment securities and derivative instruments, if applicable, for federal income tax purposes was as follows:

Aggregate gross unrealized appreciation	\$ 52,785,819
Aggregate gross unrealized depreciation	 (49,289,721)
Net unrealized appreciation	\$ 3,496,098
Federal income tax cost	\$ 795,543,485

Value and

Futures Contracts Purchased

S&P 500® High Income ETF had the following open long futures contracts as of May 31, 2025:

	Number of Contracts	Expiration Date	Trading Currency	Not	ional Amount	Į	Jnrealized ppreciation
S&P 500 E-Mini Index	65	6/20/2025	U.S. Dollar	\$	19,227,000	\$	1,130,973

Swap Agreements^a

S&P 500® High Income ETF had the following open non-exchange traded total return swap agreements as of May 31, 2025:

Notional Amount (\$)	Termination Date ^b	Counterparty	Rate Paid (Received)°	Reference Instrument	Value and Unrealized Depreciation ^d (\$)	Financial Instruments for the Benefit of (the Fund)/the Counterparty (\$)	Cash Collateral for the Benefit of (the Fund)/the Counterparty (\$)	Net Amount ^o (\$)

803,635,968	_				(23,963,675)			
	•			Total Unrealized Depreciation	(23,963,675)			

a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.

b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.

c No financing fee is paid or received on this swap.

d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.

e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.

212 :: FINANCIAL HIGHLIGHTS PROSHARES TRUST

ProShares Trust Notes to Financial Highlights:

- (a) Per share net investment income (loss) has been calculated using the average daily shares method.
- (b) Includes transaction fees associated with the issuance and redemption of Creation Units.
- (c) Not annualized for periods less than one year.
- (d) Net asset value total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, if any, and redemption on the last day of the period at net asset value. This percentage is not an indication of the performance of a shareholder's investment in the Fund based on market value due to differences between the market price of the shares and the net asset value per share of the Fund.
- (e) Market value total return is calculated assuming an initial investment made at the market value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, if any, and redemption on the last day of the period at market value. Market value is determined by the composite closing price. Composite closing security price is defined as the last reported sale price from any primary listing market (e.g., NYSE and Nasdaq) or participating regional exchanges or markets. The composite closing price is the last reported sale price from any of the eligible sources, regardless of volume and not an average price and may have occurred on a date prior to the close of the reporting period. Market value may be greater or less than net asset value, depending on the Fund's closing price on the listing market.
- (f) Annualized for periods less than one year.
- (g) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the sales and purchases of fund shares during the period. In-Kind transactions are not included in the portfolio turnover calculations.
- (h) Per share amount is less than \$0.005.
- (i) The amount shown for a share outstanding throughout the period is not in accordance with the aggregate net realized and unrealized gain (loss) for that period because of the timing of sales and repurchases of the Fund shares in relation to fluctuating market value of the investments in the Fund.
- (j) Amount has been reclassified based on the tax character of the distributions for the tax year ended October 31, 2022.
- (k) Includes net futures account fees amounting to 0.03%. Excluding these fees, the ratio of expenses to average net assets would have been 0.70%.
- (l) Includes net futures account fees amounting to 0.06%. Excluding these fees, the ratio of expenses to average net assets would have been 0.65%.
- (m) Includes net futures account fees amounting to 0.02%. Excluding these fees, the ratio of expenses to average net assets would have been 0.65%.
- (n) Reflects special dividends paid out during the period by one of the Fund's holdings. Had the Fund not received the special dividends, the net investment income (loss) per share would have been \$(0.38) and the net investment income (loss) net of waivers ratio would have been (0.45)%.
- (o) Less than 0.005%.
- † Per share amounts have been restated on a retroactive basis to reflect share splits and reverse share splits, as applicable. See Note 14.

NOTES TO FINANCIAL STATEMENTS

1. Organization

ProShares Trust (the "Trust") is registered as an open-end management investment company under the Investment Company Act of 1940 ("1940 Act"). The Trust was formed as a Delaware statutory trust on May 29, 2002, has authorized capital of an unlimited number of shares at no par value and is comprised of 131 operational funds. These accompanying Notes to Financial Statements relate to the portfolios of the Trust included in this report (collectively, the "Funds" and individually, a "Fund"). Each Fund qualifies as an investment company as defined in the Financial Accounting Standards Codification Topic 946 – Financial Services – Investment Companies. Each Fund is considered to be "non-diversified" under the 1940 Act, except for ProShares DJ Brookfield Global Infrastructure ETF, ProShares Equities for Rising Rates ETF, ProShares High Yield-Interest Rate Hedged, ProShares Investment Grade-Interest Rate Hedged, ProShares Metaverse ETF, ProShares MSCI EAFE Dividend Growers ETF, ProShares MSCI Emerging Markets Dividend Growers ETF, ProShares MSCI Europe Dividend Growers ETF, ProShares MSCI Transformational Changes ETF, ProShares Nasdaq-100 High Income ETF, ProShares Russell 2000 Dividend Growers ETF, ProShares S&P 500® Ex-Energy ETF, ProShares S&P 500® Ex-Energy ETF, ProShares S&P 500® Ex-Financials ETF, ProShares S&P 500® Ex-Health Care ETF, ProShares S&P 500® Ex-Technology ETF, ProShares S&P 500® High Income ETF and ProShares S&P MidCap 400® Dividend Aristocrats ETF.

Each Fund seeks daily investment results, before fees and expenses, that correspond to the daily results (or inverse of the daily results) of its underlying index.

In this reporting period, the Trust adopted Financial Accounting Standards Board ("FASB") Accounting Standards Update 2023-07, Segment Reporting (Topic 280) — Improvements to Reportable Segment Disclosures ("ASU 2023-07"). Adoption of the enhanced standard impacted financial statement disclosures only and did not affect the Funds' financial position or results of operations. Operating segments are components of an entity that engage in business activities, have discrete financial information available, and have their operating results regularly reviewed by a chief operating decision maker ("CODM") when assessing segment performance and making decisions about segment resources. Each Fund included herein is deemed to be an individual reporting segment and Officers of ProShares Trust, collectively act as CODM. The CODM monitors the operating results of the Trust as a whole and each Fund's long-term strategic asset allocation is guided by each Fund's investment objective and principal investment strategies as described in its prospectus and executed by ProShare Advisors LLC (the "Advisor"). The financial information provided to and reviewed by the CODM is consistent with that presented in the Trust's financial statements.

2. Significant Accounting Policies

The net asset value per share ("NAV") of each Fund, except as detailed below, is generally determined as of the close of the regular trading session of the exchange on which it is listed (is typically calculated as of 4:00 p.m. Eastern Time) on each business day. The NAV of ProShares High Yield - Interest Rate Hedged, ProShares Inflation Expectations ETF and ProShares Investment Grade - Interest Rate Hedged is typically calculated as of 3:00 p.m. (Eastern Time) on each business day. The NAV of ProShares K-1 Free Crude Oil ETF (formerly known as ProShares K-1 Free Crude Oil Strategy ETF) is typically calculated as of 2:30 p.m. (Eastern Time) on each business day when the Cboe BZX Exchange Inc. ("BZX Exchange") is open for trading. The NAV of each of ProShares MSCI EAFE Dividend Growers ETF and ProShares MSCI Europe Dividend Growers ETF is typically calculated as of 11:30 a.m. Eastern Time (this time may vary due to differences in when daylight savings time is effective between London and New York. The actual valuation time is 4:30 p.m., London Time).

The following is a summary of significant accounting policies followed by each Fund in preparation of its financial statements. These policies are in conformity with U.S. generally accepted accounting principles ("GAAP"). The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts. The actual results could differ from those estimates.

Investment Valuation

The Funds record their investments at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Pursuant to Rule 2a-5 (the "Rule"), the Trust's Board of Trustees (the "Board") designated ProShare Advisors LLC (the "Advisor") the "Valuation Designee" as contemplated by the Rule. The Valuation Designee is responsible for assessing and managing valuation risks, administering the pricing and valuation guidelines approved by the Board, and overseeing pricing services utilized in valuing the Trust's security holdings, among other responsibilities outlined in the Rule. When the Advisor determines that the price of a security is not readily available or deemed unreliable (e.g., an approved pricing service does not provide a price, a furnished price is in error, certain prices become stale, or an event occurs that materially affects the furnished price), it may in good faith establish a fair value for that security in accordance with the pricing and valuation guidelines. Fair value pricing may require subjective determinations about the value of a security. While the Trust's policy is intended to result in a calculation of a Fund's NAV that fairly reflects security values as of the time of pricing, the Trust cannot ensure that fair values determined by the

Advisor or persons acting at their direction would accurately reflect the price that a Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a Fund may differ from the value that would be realized if the securities were sold and the differences could be material to the financial statements. Depending on the source and relative significance of valuation inputs, these instruments may be categorized as Level 2 or Level 3 in the fair value hierarchy described below.

The securities in the portfolio of a Fund that are listed or traded on a stock exchange or the Nasdaq Stock Market, except as otherwise noted, are generally valued at the closing price, if available, or the last sale price on the exchange or system where the security is principally traded, generally using information provided by a third party pricing service, or market quotations. These valuations are typically categorized as Level 1 in the fair value hierarchy. If there have been no sales for that day on the exchange or system where the security is principally traded, then fair value may be determined with reference to the mean of the latest bid and asked quotes, if applicable, on the exchange or system. If there have been no sales or quotes of the security for that day on the exchange or system, the security will be valued in accordance with the pricing and valuation guidelines.

Exchange traded funds held by ProShares K-1 Free Crude Oil ETF are valued at the last traded price at the time the Fund NAV is determined, and will typically be categorized as a Level 1 in the fair value hierarchy. Exchange traded funds held by other Funds are generally valued at the closing price, if available, or the last sale price as described above, and are typically categorized as Level 1 in the fair value hierarchy.

Securities regularly traded in the over-the-counter ("OTC") markets, including securities listed on an exchange but that are primarily traded OTC, other than those traded on the Nasdaq Stock Market, are valued on the basis of the mean between the bid and asked quotes furnished by primary market makers for those instruments. Fixed-income securities are valued according to prices as furnished by an independent pricing service, generally at the mean of the bid and asked quotes for U.S. Treasury securities and at the bid or evaluated bid price for corporate bonds. Centrally cleared index-based swaps are generally valued at the mean between the bid and asked prices as furnished by an independent pricing service. In each of these situations, valuations are typically categorized as Level 2 in the fair value hierarchy.

Exchange traded bond, commodity and currency futures contracts are generally valued at the official futures settlement price, except for currency futures contracts held by Hedge Replication ETF which are generally valued at their last sale price prior to the time at which the NAV of the Fund is determined. These valuations are typically categorized as Level 1 in the fair value hierarchy. If there was no sale on that day, fair valuation procedures as previously described may be applied. Non-exchange traded derivatives (e.g. non-exchange traded swap agreements) are generally valued using independent sources and/or agreement with counterparties or other procedures approved by the Board and are typically categorized as Level 2 in the fair value hierarchy.

The Funds disclose the fair value of their investments in a hierarchy that distinguishes between: (1) market participant assumptions which are developed based on market data obtained from sources independent of the Funds (observable inputs) and (2) the Funds' own assumptions about market participant assumptions which are developed based on the best information available under the circumstances (unobservable inputs). The three levels defined by the hierarchy are as follows:

- Level 1- Quoted prices in active markets for identical assets.
- Level 2— Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3— Significant unobservable inputs (including assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For example, short-term debt securities maturing in sixty days or less may be valued at amortized cost. Generally, amortized cost approximates the current fair value of a security, but since the valuation is not obtained from a quoted price in an active market, such securities are typically categorized as Level 2. Fair value measurements may also require additional disclosure when the volume and level of activity for the asset or liability have significantly decreased, as well as when circumstances indicate that a transaction is not orderly.

LEVEL 3 -

The following is a summary of the valuations as of May 31, 2025, for each Fund based upon the three levels defined above:

										LEVEL 3 - Significant Unobservable	_

(a) Security has zero value

Please refer to the Schedules of Portfolio Investments to view equity and debt securities segregated by industry type. For the year ended May 31, 2025, there were no Level 3 securities which are considered quantitatively significant for additional disclosure, except as disclosed below.

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value:

S&P Global Core Battery Metals ETF

Balance as of 05/31/2024	\$ _
Net Realized Gain (Loss) from Transactions in investment securities	(399)
Change in Unrealized Appreciation/Depreciation from Investment securities	(11,936)
Purchases	49,810
Sales	(1,741)
Transfers into Level 3	50,550
Transfer out of Level 3	
Balance as of 05/31/2025	\$ 86,284
The amount of change in net unrealized appreciation (depreciation) on investment in Level 3 securities still held at 05/31/2025	(11,936)

The following table displays a summary of the valuation techniques and unobservable inputs used to value the Fund's securities characterized as Level 3 investments for the year ended May 31, 2025.

	Fair Value at	Valuation	Unobservable
Asset Type	May 31, 2025	Technique(s)	Input
Common Stocks	\$ 86 284	Last Traded Price	#

There were no quantitative unobservable inputs significant to the valuation technique that were created by the Advisor. Significant fluctuations of any unobservable inputs applied to portfolio securities characterized as Level 3 investments could be expected to significantly increase or decrease the fair value of the Fund's securities.

Foreign Currency Translation

Each Fund's accounting records are maintained in U.S. dollars. Assets and liabilities denominated in foreign currencies and commitments under forward foreign currency exchange contracts are translated into U.S. dollars as of the close of London world markets, except that such translations with respect to the ProShares Big Data Refiners ETF, ProShares DJ Brookfield Global Infrastructure ETF, ProShares Global Listed Private Equity ETF, ProShares Merger ETF, ProShares Metaverse ETF, ProShares MSCI Emerging Markets Dividend Growers ETF, ProShares MSCI Transformational Changes ETF, ProShares Nanotechnology ETF, ProShares On-Demand ETF, ProShares Pet Care ETF, ProShares S&P Global Core Battery Metals ETF, ProShares S&P Kensho Cleantech ETF, ProShares S&P Kensho Smart Factories ETF, ProShares Smart Materials ETF and ProShares Supply Chain Logistics ETF each utilize the last quoted New York rates prior to 4:00 p.m. The Funds do not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Repurchase Agreements

Each of the Funds may enter into repurchase agreements. Repurchase agreements are primarily used by the Funds as short-term investments for cash positions. Under a repurchase agreement, a Fund purchases one or more debt securities and simultaneously agrees to sell those securities back to the seller at a mutually agreed-upon future price and date, normally one day or a few days later. The resale price is greater than the purchase price, reflecting an agreed-upon market interest rate during the purchaser's holding period. While the maturities of the underlying securities in repurchase transactions may be more than one year, the term of each repurchase agreement will always be less than one year. The Funds follow certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions generally with major global financial institutions whose creditworthiness is monitored by the Advisor. In addition, the value of the collateral underlying the repurchase agreement is required to be at least equal to the repurchase price, including any accrued interest income earned on the repurchase agreement. The Funds may invest in repurchase agreements through joint account arrangements; in such cases, each Fund holds a pro rata share of the collateral and interest income based upon the dollar amount of the repurchase agreements entered into by each Fund. The collateral underlying the repurchase agreement is held by the Fund's custodian. A repurchase agreement is subject to the risk that the counterparty to the repurchase agreement that sells the securities may default on its obligation to repurchase them. In this circumstance, a Fund may lose money because it may not be able to sell the securities at the agreed upon time and price, the securities may lose value before they can be sold, the selling institution may declare bankruptcy or the Fund may have difficulty exercising rights to the collateral. During periods of high demand for repurchase agreements, the Funds may be unable to invest available cash in these instruments to the extent desired by the Advisor. Repurchase agreements usually are for short periods, such as one week or less, but may be longer. It is the current policy of each Fund not to invest in repurchase agreements that do not mature within seven days if any such investment, together with any other illiquid assets held by the Fund, amounts to more than 15% of Fund's total net assets. The investments of each Fund in repurchase agreements at times may be substantial when, in the view of the Advisor, liquidity, investment, regulatory, or other considerations so warrant.

On May 31, 2025, the Funds had an undivided interest in joint repurchase agreements with the following counterparties, for the time periods and rates indicated. Amounts shown in the table below represent Principal Amount, Cost and Value for each respective repurchase agreement.

Each Repurchase Agreement was fully collateralized by U.S. government and/or agency securities at May 31, 2025 as follows:

- (a) U.S. Treasury Bonds, 0% to 4.50%, due 8/15/2027 to 11/15/2054; U.S. Treasury Notes, 4.63% to 4.75%, due 7/31/2025 to 6/15/2027, which had an aggregate value at the Trust level of \$612,000,000.
- (b) U.S. Treasury Bonds, 0%, due 11/15/2026 to 11/15/2050; U.S. Treasury Notes, 1.25% to 4.13%, due 2/28/2027 to 3/31/2028, which had an aggregate value at the Trust level of \$714,000,011.
- (c) U.S. Treasury Bonds, 0% to 6.13%, due 8/15/2025 to 2/15/2055; U.S. Treasury Notes, 2.38% to 2.38%, due 10/15/2028 to 10/15/2028, which had an aggregate value at the Trust level of \$357,000,011.
- (d) U.S. Treasury Bills, 0%, due 8/28/2025 to 4/16/2026; U.S. Treasury Notes, 0.13% to 4.25%, due 10/31/2025 to 7/15/2030, which had an aggregate value at the Trust level of \$306,000,005.
- (e) U.S. Treasury Bonds, 4.5%, due 2/15/2044, which had an aggregate value at the Trust level of \$51,000,074.
- (f) U.S. Treasury Bills, 0%, due 7/10/2025; U.S. Treasury Bonds, 0% to 6.75%, due 8/31/2025 to 5/15/2055; U.S. Treasury Notes, 0.13% to 5%, due 6/30/2025 to 2/15/2035, which had an aggregate value at the Trust level of \$1,057,406,106.
- (g) U.S. Treasury Bills, 0%, due 9/25/2025 to 1/22/2026; U.S. Treasury Bonds, 0% to 5.50%, due 2/15/2028 to 2/15/2050; U.S. Treasury Notes, 0.38% to 4.43%, due 7/31/2025 to 8/15/2033, which had an aggregate value at the Trust level of \$510,178,528.
- (h) U.S. Treasury Bills, 0%, due 6/26/2025 to 10/30/2025; U.S. Treasury Bonds, 0% to 5.50%, due 2/15/2028 to 8/15/2054; U.S. Treasury Notes, 0% to 4.88%, due 12/31/2025 to 1/15/2035, which had an aggregate value at the Trust level of \$1,020,368,105.

Equity Securities

Certain Funds may invest in equity securities, including in shares of foreign or U.S. common stock, Real Estate Investment Trusts, Depositary Receipts, and shares of other Investment Companies, including other exchange traded funds ("ETFs").

Real Estate Investment Trusts ("REITs") and Business Development Companies ("BDCs")

REITs and BDCs report information on the source of their distributions annually. A portion of distributions received from REITs and BDCs during the period is estimated to be dividend income, realized gain or return of capital. These estimates are adjusted when the actual source of distributions is disclosed by the REITs and BDCs.

Debt Instruments

Certain Funds may invest in debt instruments, including U.S. government securities; Foreign and U.S. investment grade corporate debt securities. Additionally, certain Funds may invest in (lower rated) debt instruments (also known as "junk bonds") that are rated below "investment grade" by Moody's, Standard and Poor's and/or Fitch, Inc.

Securities Lending

Certain Funds may lend securities to brokers, dealers and financial organizations in exchange for initial collateral in the amount of at least 102% of the value of U.S. dollar-denominated securities loaned or at least 105% of the value of non-U.S. dollar-denominated securities loaned, marked to market daily. Each security loaned will be secured continuously by collateral in the form of cash, Money Market Instruments or U.S. Government securities with a market value of at least 100% of the market value of the loaned securities. When a Fund lends its securities, it continues to receive payments equal to the dividends and interest paid on the securities loaned and simultaneously may earn interest on the reinvestment of the cash collateral. Any cash collateral received by the Fund in connection with these loans may be reinvested in a variety of short-term investments. Any securities collateral received by the Fund in connection with these loans may not be sold or pledged by the Fund and, accordingly, are not reflected in the Fund's assets and liabilities. The Funds may incur fees and expenses in connection with the reinvestment of cash collateral. For security loans collateralized by cash, borrowers may be entitled to receive a fee based on the amount of collateral. The Funds are typically compensated by the difference between the amount earned on the reinvestment of cash collateral and any fees paid to the borrower. Although voting and other rights attendant to securities loaned pass to the borrower, such loans may be recalled so that the securities may be voted on by the Fund if a material event affecting the Fund's investment in the securities on loan is to occur. Security loans are subject to termination by the Fund or the borrower at any time. Not all Funds may participate in securities lending at any given time. No securities loan shall be made on behalf of a Fund if, as a result, the aggregate value of all securities loaned by the particular Fund exceeds one-third of the value of such Fund's total assets (including the value of the collateral received).

Securities lending involves exposure to certain risks, including "gap" risk (i.e., the risk of a mismatch between the return on cash collateral reinvestments and any fees a Fund has agreed to pay a borrower), operational risk (i.e., the risk of losses resulting from problems in the settlement and the accounting process), legal, counterparty and credit risk. If a securities lending counterparty were to default, a Fund would be subject to the risk of a possible delay in receiving collateral or in recovering the loaned securities, or to a possible loss of rights in the collateral. In the event a borrower does not return a Fund's securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated, plus the transaction costs incurred in purchasing replacement securities. This event could trigger adverse tax consequences for a Fund. The investment of cash collateral deposited by the borrower is subject to inherent market risks such as interest rate risk, credit risk, liquidity risk, and other risks that are present in the market. A Fund could lose money if its short-term reinvestment of the collateral declines in value over the period of the loan. The market value of the loaned securities is determined at the close of each business day of the Fund and any additional required collateral is delivered to the Fund, or excess collateral returned by the Fund, on the next business day.

U.S. Treasury Inflation-Protected Securities

U.S. Treasury Inflation-Protected Securities ("TIPs") are inflation-protected public obligations of the U.S. Treasury. Inflation-protected bonds are fixed-income securities whose interest and principal payments are periodically adjusted for inflation. As the index measuring inflation changes, the interest and principal payments of inflation-protected bonds will be adjusted accordingly. Because of the inflation-adjustment feature, inflation-protected bonds typically have lower yields than conventional fixed rate bonds.

Accounting for Derivatives Instruments

In seeking to achieve the investment objectives of Funds whose objective is tied to an index or benchmark, the Advisor uses a passive approach to investing that is designed to track the performance of the Fund's underlying index or benchmark. Each such Fund attempts to achieve its investment objective by investing all, or substantially all, of its assets in investments that make up its index or in financial instruments that provide similar exposure.

In connection with its management of certain series of the Trust included in this report (i.e. ProShares K-1 Free Crude Oil ETF (the "Commodity Pools")), the Advisor has registered as a commodity pool operator (a "CPO") and the Commodity Pools are commod-

ity pools under the Commodity Exchange Act (the "CEA"). Accordingly, the Advisor is subject to registration and regulation as a CPO under the CEA, and must comply with various regulatory requirements under the CEA and the rules and regulations of the Commodity Futures Trading Commission ("CFTC") and the National Futures Association ("NFA"), including investor protection requirements, antifraud provisions, disclosure requirements and reporting and record keeping requirements. The Advisor is also subject to periodic inspections and audits by the CFTC and NFA. Compliance with these regulatory requirements could adversely affect the Commodity Pools' total return. In this regard, any further amendment to the CEA or its related regulations that subject the Advisor or the Commodity Pools to additional regulation may have adverse impacts on the Commodity Pools' operations and expenses.

All open derivative positions at period end are reflected on each respective Fund's Schedule of Portfolio Investments. Certain Funds utilized a varying level of derivative instruments in conjunction with investment securities in seeking to meet their investment objective during the period. While the volume of open positions may vary on a daily basis as each Fund transacts derivative contracts in order to achieve the appropriate exposure to meet its investment objective, with the exception of the Funds listed below, the volume of these open positions relative to the net assets of each respective Fund at the date of this report is generally representative of open positions throughout the reporting period.

Average quarterly exposure to derivatives (notional amounts in comparison to net assets)

65%

Merger ETF....

For financial reporting purposes, the Trust can offset financial assets and financial liabilities that are subject to master netting arrangements or similar agreements in the Statement of Assets and Liabilities. Funds holding non-exchange traded swap agreements present the gross amounts of these assets and liabilities on their Schedule of Portfolio Investments. Information concerning the value of and amounts due under Repurchase Agreement transactions may be found on each Fund's Schedule of Portfolio Investments. Information concerning the counterparties to each Repurchase Agreement and levels of collateralization may be found above, under the caption "Repurchase Agreements."

Following is a description of the Funds' use of derivative instruments, the types of derivatives utilized by the Funds during the reporting period, as well as the primary underlying risk exposures related to each instrument type.

Futures Contracts

Each Fund may purchase or sell futures contracts as a substitute for a comparable market position in the underlying securities or to satisfy regulatory requirements. A physical-settlement futures contract generally obligates the seller to deliver (and the purchaser to take delivery of) the specified asset on the expiration date of the contract. A cash-settled futures contract obligates the seller to deliver (and the purchaser to accept) an amount of cash equal to a specific dollar amount (the contract multiplier) multiplied by the difference between the final settlement price of a specific futures contract and the price at which the agreement is made. No physical delivery of the underlying asset is made.

The Funds generally engage in closing or offsetting transactions before final settlement of a futures contract, wherein a second identical futures contract is sold to offset a long position (or bought to offset a short position). In such cases, the obligation is to deliver (or take delivery of) cash equal to a specific dollar amount (the contract multiplier) multiplied by the difference between the price of the offsetting transaction and the price at which the original contract was entered into. If the original position entered into is a long position (futures contract purchased) there will be a gain (loss) if the offsetting sell transaction is carried out at a higher (lower) price, inclusive of commissions. If the original position entered into is a short position (futures contract sold) there will be a gain (loss) if the offsetting buy transaction is carried out at a lower (higher) price, inclusive of commissions.

Whether a Fund realizes a gain or loss from futures activities depends generally upon movements in the underlying currency, commodity, security or index. The extent of the Fund's loss from an unhedged short position in futures contracts is potentially unlimited. Each Fund will engage in transactions in futures contracts that are traded on a U.S. exchange or board of trade or that have been approved for sale in the U.S. by the CFTC.

Upon entering into a futures contract, each Fund will be required to deposit with the broker an amount of cash or cash equivalents in the range of approximately 5% to 10% of the contract amount for equity, index and commodity futures and in the range of approximately 1% to 3% of the contract amount for bond and currency futures (these amounts are subject to change by the exchange on which the contract is traded). This amount, known as "initial margin," is in the nature of a performance bond or good faith deposit on the contract and is returned to the Fund upon termination of the futures contract, assuming all contractual obligations have been satisfied. Subsequent payments, known as "variation margin," to and from the broker will be made as the price of the security, currency, commodity or index underlying the futures contract fluctuates, making the long and short positions in the

futures contract more or less valuable, a process known as "marking-to-market." Net income and net fees related to cash collateral deposited with the broker are reflected on the Statements of Operations as "Interest" or "Futures Commission Merchant fees", respectively. At any time prior to expiration of a futures contract, a Fund may elect to close its position by taking an opposite position, which will operate to terminate the Fund's existing position in the contract.

The primary risks associated with the use of futures contracts are imperfect correlation between movements in the price of the futures contract and the market value of the underlying assets, and the possibility of an illiquid market for a futures contract. Although each Fund intends to sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit, or trading may be suspended for specified periods during the day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting a Fund to substantial losses. If trading is not possible, or if a Fund determines not to close a futures position in anticipation of adverse price movements, the Fund will be required to make daily cash payments of variation margin. The risk that the Fund will be unable to close out a futures position will be minimized by entering into such transactions on a national exchange with an active and liquid secondary market. In addition, although the counterparty to a futures contract is often a clearing organization, backed by a group of financial institutions, there may be instances in which the counterparty could fail to perform its obligations, causing significant losses to a Fund.

Forward Currency Contracts

Certain Funds may invest in forward currency contracts for investment or risk management purposes. A forward currency contract is an obligation to buy or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are entered into on the interbank market conducted directly between currency traders (usually large commercial banks) and their customers.

At or before the maturity of a forward currency contract, a Fund may either sell a portfolio security and make delivery of the currency, or retain the security and terminate its contractual obligation to deliver the currency by buying an "offsetting" contract obligating it to buy, on the same maturity date, the same amount of the currency. If the Fund engages in an offsetting transaction, it may later enter into a new forward currency contract to sell the currency.

If a Fund engages in offsetting transactions, the Fund will incur a gain or loss, to the extent that there has been movement in forward currency contract prices. If forward prices go down during the period between the date a Fund enters into a forward currency contract for the sale of a currency and the date it enters into an offsetting contract for the purchase of the currency, the Fund will realize a gain to the extent that the price of the currency it has agreed to sell exceeds the price of the currency it has agreed to buy. If forward prices go up, the Fund will suffer a loss to the extent the price of the currency it has agreed to buy exceeds the price of the currency it has agreed to sell.

Non-deliverable forward foreign currency exchange contracts are settled with the counterparty in U.S. dollars without the delivery of foreign currency.

Swap Agreements

Certain Funds may enter into swap agreements to gain exposure to an underlying asset without actually purchasing such asset (or shorting such asset), or to hedge a position, including in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one year. In a standard "swap" transaction, two parties agree to exchange the return (or differentials in rates of return) earned or realized on a particular pre-determined investment or instrument. The gross return to be exchanged or "swapped" between the parties is calculated with respect to a "notional amount," e.g., the return on or change in value of a particular dollar amount invested in a "basket" of securities or an ETF representing a particular index or group of securities.

Most swap agreements entered into by a Fund calculate and settle the obligations of the parties to the agreement on a "net basis" with a single payment. Consequently, a Fund's current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount").

When investing in swap agreements, the Funds may hold or gain exposure to only a representative sample of the securities in an index, or to a component of the index.

On a typical long swap, the counterparty will generally agree to pay the Fund the amount, if any, by which the notional amount of the swap agreement would have increased in value had it been invested in the particular underlying assets (e.g., an ETF, or securities comprising an index), plus any dividends or interest that would have been received on those assets. The Fund will agree to pay

to the counterparty a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such assets plus, in certain circumstances, commissions or trading spreads on the notional amount. Therefore, the return to the Fund on a long swap should be the gain or loss on the notional amount plus dividends or interest on the assets less the interest paid by the Fund on the notional amount. As a trading technique, the Advisor may substitute physical securities with a swap agreement having investment characteristics substantially similar to the underlying securities.

Some Funds may also enter into swap agreements that provide the opposite return of their index or a security. These swaps are similar to the long swaps disclosed above except that the counterparty pays interest to each Fund on the notional amount outstanding and that dividends or interest on the underlying instruments reduce the value of the swap. In addition, in certain instances, each Fund will agree to pay to the counterparty commissions or trading spreads on the notional amount. These amounts are netted with any unrealized gain or loss to determine the value of the swap.

A Fund's current obligations under most swap agreements (total return swaps, equity/index swaps, interest rate swaps) will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by segregating or earmarking cash and/or securities determined to be liquid, but typically no payments will be made until the settlement date.

A Fund will not enter into uncleared swap agreements (i.e., not cleared by a central counterparty) unless the Advisor believes that the counterparty to the transaction is creditworthy. The counterparty to an uncleared swap agreement will typically be a major global financial institution. A Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. If such a default occurs, a Fund will have contractual remedies pursuant to the swap agreements, but such remedies may be subject to bankruptcy and insolvency laws that could affect the Fund's rights as a creditor.

In the normal course of business, a Fund enters into International Swaps and Derivatives Association ("ISDA") agreements with certain counterparties for derivative transactions. These agreements contain, among other conditions, events of default and termination events, and various covenants and representations. Certain of the Fund's ISDA agreements contain provisions that require the Fund to maintain a pre-determined level of net assets, and/or provide limits regarding the decline of the Fund's NAV over specific periods of time, which may or may not be exclusive of redemptions. If the Fund were to trigger such provisions and have open derivative positions at that time, counterparties to the ISDA agreements could elect to terminate such ISDA agreements and request immediate payment in an amount equal to the net liability positions, if any, under the relevant ISDA agreement. Pursuant to the terms of its ISDA agreements, the Fund will have already collateralized its liability under such agreements, in some cases only in excess of certain threshold amounts. The Funds seek to mitigate risks by generally requiring that the counterparties for each Fund agree to post collateral for the benefit of the Fund, marked to market daily, in an amount approximately equal to what the counterparty owes the Fund, subject to certain minimum thresholds, although the Funds may not always be successful. To the extent any such collateral is insufficient or there are delays in accessing the collateral, the Funds will be exposed to risks, including possible delays in recovering amounts as a result of bankruptcy proceedings.

The use of swaps is a highly specialized activity which involves investment techniques and risks in addition to, and in some cases different from, those associated with ordinary portfolio securities transactions. The primary risks associated with the use of swap agreements are mispricing or improper valuation, imperfect correlation between movements in the notional amount and the price of the underlying investments, and the inability of counterparties or clearing organizations to perform. A Fund may use a combination of swaps on an underlying index and swaps on an ETF that is designed to track the performance of that index, or it may solely use swaps on an ETF to achieve its desired investment exposure. The performance of an ETF may not track the performance of its underlying index due to embedded costs and other factors. Thus, to the extent a Fund invests in swaps that use an ETF as the reference asset, that Fund may be subject to greater correlation risk and may not achieve as high a degree of correlation with its index as it would if the Fund used only swaps on the underlying index. The Advisor, under supervision from the Board, is responsible for determining and monitoring the liquidity of the Funds' transactions in swap agreements.

All of the outstanding swap agreements held by the Funds on May 31, 2025 contractually terminate within 23 months but may be terminated without penalty by either party daily. Upon termination, the Fund is entitled to receive or pay the "unrealized appreciation or depreciation" amount existing at the date of termination.

The Financial Accounting Standards Board, pursuant to Accounting Standards Codification 815-10 ("ASC 815-10"), requires companies (including the Trust) to disclose information intended to enable financial statement users to understand how derivative instruments affect the Statements of Assets and Liabilities as well as the effect of derivative instruments on the Statements of Operations during the reporting period, in the context of each entity's risk exposure. ASC 815-10 provides examples of risk exposure, including interest rate, foreign exchange, equity, commodity and credit.

As the Funds' investment objective is to provide investment results, before fees and expenses, that correspond to the return or inverse return of its underlying index on a daily basis, the derivatives utilized are aligned to the same primary risk. The primary

risk exposure for those Funds benchmarked to an equity index is equity risk, for Funds benchmarked to a fixed-income index the primary risk is interest rate risk and for the foreign currency contracts held by ProShares Merger ETF and for the currency futures contracts held by ProShares Hedge Replication ETF, the primary risk is foreign currency risk. The primary risk for ProShares K-1 Free Crude Oil ETF is commodity market risk.

The following tables indicate the location of derivative-related items on the Statements of Assets and Liabilities as well as the effect of derivative instruments on the Statements of Operations during the reporting period.

⁽a) Commencement of investment operations from September 4, 2024 through May 31, 2025.

Taxes and Distributions

Each of the Funds intends to qualify or continue to qualify as a regulated investment company and distribute substantially all of its net investment income and capital gains to shareholders. Accordingly, no provision for Federal income taxes is required in the financial statements.

As of May 31, 2025, management of the Funds has reviewed all open tax years and major jurisdictions (the last four tax year ends including the interim tax periods since then, as applicable) and concluded that there is no tax liability resulting from unrecognized tax benefits relating to uncertain income tax positions taken or expected to be taken in future tax returns. The Funds are also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next 12 months.

Distributions to shareholders from net investment income and net capital gain, if any, are declared and paid at least annually. The amount of distributions from net investment income and net realized gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; (e.g., wash sales, straddles, 1256 mark-to-market, partnerships, passive foreign investment companies mark-to-market, constructive sales adjustments and qualified late-year loss deferrals) do not require a reclassification. Under current law, each Fund is permitted to treat on its tax return as dividends paid the portion of redemption proceeds paid to redeeming shareholders that represents the redeeming shareholders' portion of the Fund's accumulated earnings and profits. This practice, called tax "equalization," reduces the amount of income and/or gains that the Funds are required to distribute as dividends to non-redeeming shareholders. While subject to management's discretion, any available tax equalization is typically applied first to short term capital gains, next to long term capital gains and then to ordinary income. To the extent distributions exceed net investment income and net realized capital gains for tax purposes, they are reported as a tax return of capital.

The Funds' tax year end is October 31st and the tax character of current year distributions and current components of accumulated earnings (deficit) will be determined at the end of the current tax year. The wholly-owned subsidiary of ProShares K-1 Free Crude Oil ETF organized under the laws of the Cayman Islands has a October 31st tax year-end.

The tax character of distributions paid for the most recent tax years ended October 31, 2024 and October 31, 2023, were as follows:

_	١	ear Ended Oct	ober 31, 2024	024 Year Ended October 31, 2023					
Fund	Distributions paid from ordinary income	Distributions paid from net long-term capital gains	Tax return of capital	Total Distributions	Distributions paid from ordinary income	Distributions paid from net long-term capital gains	Tax return of capital	Total Distributions

Temporary differences are generally due to differing book and tax treatments for the timing of the recognition of gains and losses on certain investment transactions and the timing and the deductibility of certain expenses. Permanent differences, primarily due to gain (loss) on in-kind redemptions, reclassification on sale of derivatives, investments in subsidiary units, equalization and nondeductible expenses, resulted in reclassifications as of October 31, 2024 (the Funds' most recent tax year end), among the Funds' components of net assets.

As of October 31, 2024 (the Funds' most recent tax year end), the Funds had capital loss carry forwards ("CLCFs") available to offset future realized gains, if any, to the extent provided for by regulations and to thereby reduce the amount of future taxable capital gain distributions. Under current tax law, CLCFs retain their character as either short-term or long-term capital losses, and are not subject to expiration.

At October 31, 2024 (the Funds' most recent tax year end), the following Funds had available CLCFs:

3. Investment Transactions, Income and Expense Allocations

Throughout the reporting period, investment transactions are generally accounted for no later than one business day following the trade date. For financial reporting purposes, investment transactions on the last business day of the reporting period are accounted for on the trade date.

Interest income is recognized on an accrual basis and includes, where applicable, the amortization of premium or discount. Dividend income is recorded on the ex-dividend date except for certain foreign dividends that may be recorded as soon as such information becomes available. Non-cash dividend income received in the form of securities in-lieu of cash are recorded at the fair value of the securities received. Gains or losses realized on sales of securities are determined using the specific identification method by comparing the identified cost of the security lot sold with the net sales proceeds.

Expenses directly attributable to a Fund are charged to that Fund, while expenses which are attributable to more than one Fund or jointly with an affiliate, are allocated among the respective Funds and/or affiliates based upon relative net assets or another reasonable basis.

4. Advisory and Management Service Fees and Transactions with Affiliates

The Advisor serves as the investment adviser to each Fund subject to an expense limitation, as outlined in the table below (the "Capped Funds"), pursuant to an Investment Advisory Agreement. For its investment advisory services, each Capped Fund pays the Advisor a monthly fee, accrued daily at an annualized rate based on its average daily net assets. Pursuant to a separate Management Services Agreement, the Advisor performs certain administrative services on behalf of the Capped Funds, such as negotiating, coordinating and implementing the Trust's contractual obligations with the Funds' service providers; monitoring, overseeing and reviewing the performance of such service providers to ensure adherence to applicable contractual obligations; and preparing or coordinating reports and presentations to the Board of Trustees with respect to such service providers. For these and other services, each Capped Fund pays the Advisor monthly management services fees, accrued daily at an annualized rate based on its average daily net assets.

The Advisor has contractually agreed to waive advisory and management services fees, and if necessary, reimburse certain other expenses, in order to limit the annual operating expenses of each Capped Fund. These expense limitations remain in effect until the dates specified in the table below, after which they may be terminated or revised.

For the year ended May 31, 2025, advisory and management services fees, waivers, reimbursements, and expense limitations were as follows:

Fund	Investment Advisory Fee Rate	Management Services Fee Rate			Management Services Fees Waived			Expense Limitation	Expense Limitation Effective Through
Global Listed Private Equity			_		_				
ETF	0.50%	0.10%	\$	60,823	\$	12,165	\$ 83,677	0.60%	September 30, 2025
Hedge Replication ETF *	0.75	0.10		199,799		26,640	122,667	0.95	September 30, 2025
Inflation Expectations ETF	0.55	0.10		122,093		22,199	37,247	0.30	September 30, 2025
Merger ETF *	0.75	0.10		79,909		10,654	64,841	0.75	September 30, 2025

* In addition to the expense limitations disclosed above, the Advisor has entered into an Advisory Fee Waiver Agreement for each Fund that reduces the annualized advisory fee rate subject to the following breakpoints: 0.75% of the first \$4.0 billion of average daily net assets of the Fund, 0.70% of the next \$1.5 billion, 0.65% of the next \$1.5 billion, 0.60% of the next \$1.5 billion and 0.55% of average daily net assets of the Fund over \$8.5 billion. To the extent that a Fund achieves an asset breakpoint, the Advisor will waive fees in order to match the corresponding reduction in the tiered advisory fee limit. Any such waivers are reflected as a component of "Expenses waived and/or reimbursed by Advisor" on the Statements of Operations, and are not subject to subsequent recoupment by the Advisor.

For each Fund, amounts waived or reimbursed by the Advisor may be recouped by the Advisor within five years of the end of the applicable contractual period to the extent that such recoupments would not cause a Fund's annualized operating expenses to exceed the lesser of (1) the expense limitation in effect at the time of waiver, and (2) the expense limitation in effect at the time of recoupment. Any amounts recouped by the Advisor during the period are reflected in the Statements of Operations as "Recoupment of prior expenses waived and/or reimbursed by Advisor". As of May 31, 2025, no commitment or contingent liability is expected. The amounts eligible for recoupment and the date of expiration are as follows:

_		Expires September 30,											
												To	tal Amount
													Eligible for
<u>Fund</u>	2025		2026		2027		_2028_		2029		2030	<u>R</u>	ecoupment

The Advisor also serves as the investment adviser to each Fund not subject to an expense limitation as outlined below (the "Unitary Fee Funds") pursuant to an Investment Advisory and Management Agreement. The Unitary Fee Funds pay the Advisor a monthly fee, accrued daily at an annualized rate based on average daily net assets for investment advisory and management services. The Advisor is responsible for substantially all expenses of the Unitary Fee Funds except, generally, interest expenses, taxes, brokerage and other transaction costs, legal expenses fees and expenses related to securities lending, compensation and expenses of the Independent Trustees, compensation and expenses of the Trust's chief compliance officer and his or her staff, legal fees and expenses in connection with litigation, future distribution fees or expenses (if any), and extraordinary expenses.

The Unitary Fee Funds and their respective unitary fees are as follows:

The Advisor has contractually agreed to waive investment advisory and management services fees to the extent total annual operating expenses before waivers and expense reimbursements, as a percentage of average daily net assets, exceed 0.09% through September 30, 2025 for each of the following funds. For the year ended May 31, 2025, the amounts waived, which are not subject to recoupment, were as follows:

<u>Fund</u>	<u>A</u>	dvisory Fees Waived
S&P 500® Ex-Energy ETF	\$	(24,787)
S&P 500® Ex-Financials ETF		(25,430)
S&P 500® Ex-Health Care ETF		(10,407)
S&P 500® Ex-Technology ETF		(54,482)

Employees of the Advisor serve in the roles of Interested Trustee, President, Chief Legal Officer and Secretary of the Trust. These individuals receive no compensation directly from the Trust. Another employee of the Advisor serves as Chief Compliance Officer and Anti-Money Laundering Officer. This individual's related compensation, along with the compensation of staff who administer the Funds' compliance program, and certain other expenses are reimbursed to the Advisor by the Funds and are reflected on the Statements of Operations as "Compliance services fees".

5. Administration Fees

JPMorgan Chase Bank, N.A. acts as the Trust's administrator (the "Administrator"). The Administrator provides certain administrative services to the Funds, including fund accounting, fund administration and certain compliance services, pursuant to a Fund Services Agreement. For these services, each Fund shall pay the Administrator monthly, a fee accrued daily and based on average net assets. Each Fund may also reimburse the Administrator for such out-of-pocket expenses as incurred by the Administrator in the performance of its duties. Such fees are reflected on the Statements of Operations as "Administration Fees". Certain employees of the Administrator are also officers of the Trust.

6. Custodian Fees

JPMorgan Chase Bank, N.A. acts as custodian for the Funds in accordance with a Custody Agreement. The custodian holds cash, securities and other assets of the Funds as required by the 1940 Act. Custodian fees are payable monthly based on assets held in custody, investment purchases and sales activity and account maintenance fees, plus reimbursement for certain out-of-pocket expenses. Such fees are reflected on the Statements of Operations as "Custodian Fees".

7. Listing, Data and Related Fees

The Funds may incur costs relating to their initial and ongoing listing on an exchange and for the calculation and dissemination of Indicative Optimized Portfolio Values (IOPVs). Additionally, a Fund may enter into a license agreement for the right to use an Index and the related Trade Mark(s) and to receive data related to the index from the index provider. The portion of such costs attributed to each Fund is reflected on the Statements of Operations as "Listing, Data and related fees".

8. Trustees Fees

The Trust, together with other affiliated trusts, pay each Independent Trustee an aggregate fee consisting of a \$325,000 annual retainer (paid in quarterly increments) for services provided as a Board member. Such fees are allocated between the Funds and other affiliated funds. Each Fund's share of these fees, together with reimbursable expenses of the Trustees, is reflected on the Statements of Operations as "Trustees Fees and expenses".

9. Distribution and Service Plan

SEI Investments Distribution Co. serves as the Funds' distributor. The Trust has adopted a Distribution and Service (12b-1) Plan pursuant to which each Fund may bear a 12b-1 fee not to exceed 0.25% per annum of the Fund's average daily net assets. No 12b-1 fees are currently paid by the Funds, and there are currently no plans to impose these fees.

10. Issuance and Redemption of Fund Shares

Each Fund issues and redeems its shares only to Authorized Participants (typically broker-dealers) in exchange for the deposit or delivery of a basket of assets (securities and/or cash), in large blocks known as Creation Units, each of which is comprised of a specified number of shares.

To the extent the Funds permit the contribution of securities in exchange for the purchase of shares (contribution in-kind), shares may be issued in advance of receipt by the Fund of all or a portion of the applicable Deposit Securities. In these circumstances, the Fund may require the Authorized Participant to maintain with the Trust an amount up to 115% and/or 125% of the daily mark-to-market value of the missing Deposit Securities.

Retail investors may only purchase and sell Fund shares on a national securities exchange through a broker-dealer and such transactions may be subject to customary commission rates imposed by the broker-dealer.

Authorized Participants may pay transaction fees to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units. Transaction fees related to unsettled Creation Unit transactions are included in the receivable for capital shares issued on the Statements of Assets and Liabilities. Transaction fees assessed during the period, which are included in the proceeds from shares issued on the Statements of Changes in Net Assets, were as follows:

	Year Ended May 31, 2025	Year Ended May 31, 2024
High Yield-Interest Rate Hedged	22,505 \$	1,538
Inflation Expectations ETF	644	12,149
Investment Grade-Interest Rate Hedged	9,401	66,775

12. In-Kind Transactions

During the period ended May 31, 2025, certain Funds delivered portfolio securities in exchange for the redemption of shares (redemption-in-kind). Cash and securities were transferred for redemptions at fair value. For financial reporting purposes, the Funds recorded net realized gains and losses in connection with each transaction.

For the period ended May 31, 2025, the fair value of the securities transferred for redemptions, and the net realized gains (losses) recorded in connection with the transactions were as follows:

<u>Fund</u>	 Fair Value	Net	Realized Gains (Losses)
Big Data Refiners ETF	\$ 1,755,677	\$	503,340
DJ Brookfield Global Infrastructure ETF	100,426,526		14,724,213

13. Basis of Consolidation

The accompanying Consolidated Schedule of Portfolio Investments, Consolidated Statement of Assets and Liabilities, Consolidated Statement of Operations, Consolidated Statements of Changes in Net Assets and Consolidated Financial Highlights of Pro-Shares K-1 Free Crude Oil ETF includes the account of Pro-Shares Cayman Crude Oil Strategy Portfolio, a wholly-owned subsidiary of Pro-Shares K-1 Free Crude Oil ETF, which primarily invests in commodity-related instruments. The Subsidiary enables the Fund to hold these commodity-related instruments and satisfy regulated investment company tax requirements. The Fund will invest a significant portion of its total assets in its Subsidiary. As of May 31, 2025, the net assets of Pro-Shares Cayman Crude Oil Strategy Portfolio were 17.59% of the net assets of Pro-Shares K-1 Free Crude Oil ETF. Intercompany accounts and transactions, if any, have been eliminated. The Subsidiary is subject to the same investment policies and restrictions that apply to Pro-Shares K-1 Free Crude Oil ETF, except that the Subsidiary may invest without limitation in commodity-related instruments.

14. Share Splits and Reverse Share Splits

The effect of a share split transaction is to multiply the number of outstanding shares of the Fund by the split factor, with a corresponding decrease in the net asset value per share. The effect of the reverse share split transactions is to divide the number of outstanding shares of the Fund by the reverse split factor, with a corresponding increase in the net asset value per share. These transactions do not change the net assets of the Fund or the value of a shareholder's investment. The historical share transactions presented in the Statements of Changes in Net Assets and per share data presented in the Financial Highlights have been adjusted retroactively to give effect to share splits, as reflected in the following table.

	Effective Date	Type of Split
Large Cap Core Plus	January 13, 2022	2-for-1 forward stock split
S&P 500® Ex-Energy ETF	April 10, 2024	2-for-1 forward stock split
S&P 500® Ex-Financials ETF	April 10, 2024	2-for-1 forward stock split
S&P 500® Ex-Health Care ETF	April 10, 2024	2-for-1 forward stock split

15. Risk

Some risks apply to all Funds, while others are specific to the investment strategy of certain Funds. Each Fund may be subject to other risks in addition to these identified risks. This section discusses certain common principal risks encountered by the Funds.

Risks Associated with the Use of Derivatives

Certain Funds may obtain investment exposure through derivatives (including investing in futures contracts, securities and indexes, forward contracts, swap agreements and similar instruments). Investing in derivatives may be considered aggressive and may expose a Fund to risks different from, or possibly greater than, the risks associated with investing directly in securities underlying the derivative, including: 1) the risk that there may be imperfect correlation between the price of financial instruments and movements in the prices of the underlying reference asset(s); 2) the risk that an instrument is mispriced; 3) credit or counterparty risk on the amount each Fund expects to receive from a counterparty; 4) the risk that securities prices, interest rates and currency markets will move adversely and a Fund will incur significant losses; 5) the risk that the cost of holding a financial instrument might exceed its total return; and 6) the possible absence of a liquid secondary market for a particular instrument and possible exchange-imposed price fluctuation limits, either of which may make it difficult or impossible to adjust a Fund's position in a particular instrument when desired. The occurrence of any of these factors may prevent the Fund from achieving its investment objective. Because derivatives often require limited initial investment, the use of derivatives also may expose the Fund to losses in excess of those amounts initially invested.

Certain Funds may use a combination of swaps on an underlying index or swaps on an ETF that is designed to track the performance of that index. The performance of an ETF may not track the performance of its underlying index due to embedded costs and other factors. Thus, to the extent a Fund invests in swaps that use an ETF as the reference asset, that Fund may be subject to greater correlation risk and may not achieve as high a degree of correlation with its index as it would if the Fund used only swaps on the underlying index.

Moreover, with respect to the use of swap agreements, if an index has a dramatic intraday move that causes a material decline in a Fund's net assets, the terms of a swap agreement between the Fund and its counterparty may permit the counterparty to immediately close out the transaction with the Fund. In that event, the Fund may be unable to enter into another swap agreement or invest in other derivatives to achieve the desired exposure consistent with the Fund's investment objective. This, in turn, may prevent the Fund from achieving its investment objective, even if the Index reverses all or a portion of its intraday move by the end of the day. Any costs associated with using derivatives will also have the effect of lowering the Fund's return.

Equity and Market Risk

Equity markets are volatile, and the value of equity securities and other instruments correlated with equity markets may fluctuate dramatically from day to day. Equity markets are subject to corporate, political, regulatory, market and economic developments, as well as developments that impact specific economic sectors, industries or segments of the market.

· Long/Short Risk

Certain Funds seek long exposure to certain securities and short exposure to certain other securities. There is no guarantee that the returns on a Fund's long or short positions will produce high, or even positive, returns. In addition, Funds subject to this risk may gain enhanced long exposure to certain securities (i.e., obtain investment exposure that exceeds the amount directly invested in those assets, a form of leverage) and, under such circumstances, will lose more money in market environments that are adverse to its long positions than funds that do not employ such leverage.

Concentration Risk

Certain Funds may typically concentrate their investments in issuers of one or more particular industries to the same extent that their underlying indexes are so concentrated and to the extent permitted by applicable regulatory guidance. There is a risk that those issuers (or industry sectors) will perform poorly and negatively impact a Fund. Concentration risk results from maintaining exposure (long or short) to issuers conducting business in a specific industry. The risk of concentrating investments in a limited number of issuers in a particular industry is that a Fund will be more susceptible to the risks associated with that industry than a Fund that does not concentrate its investments.

Correlation Risk

There is no guarantee that a Fund whose investment objective, before fees and expenses, seeks correlation with an index will achieve a high degree of correlation with its index or the inverse thereof. Failure to achieve a high degree of correlation may prevent a Fund from achieving its investment objective. The percentage change of the Fund's NAV each day may differ, perhaps significantly in amount, and possibly even direction, from the percentage change of the Fund's index on such day. A number of other factors may adversely affect a Fund's correlation with its index, including material over- or under-exposure, fees, expenses, transaction costs, financing costs associated with the use of derivatives, income items, valuation methodology, infrequent trading in the securities underlying its index, accounting standards and disruptions or illiquidity in the markets for the securities or financial instruments in which a Fund invests. While each Fund generally attempts to track the performance of the Index by investing all, or substantially all, of its assets in the securities that make up the Index in approximately the same proportion as their weighting in the Index, at times a Fund may not have investment exposure to all securities in its index, or, with respect to equity funds, its weighting of investment exposure to such securities, financial investments or industries may be different from that of the index. In addition, a Fund may invest in securities or financial investments not included in the index or in financial instruments. Each Fund may take or refrain from taking positions in order to improve tax efficiency or comply with regulatory restrictions, or for other reasons, each of which may negatively affect the Fund's correlation with its index. A Fund may also be subject to large movements of assets into and out of the Fund, which may cause a difference between the changes in the daily performance of the Fund and changes in the level of the Index potentially resulting in the Fund being over- or underexposed to its index and may be impacted by index reconstitutions and index rebalancing events. Additionally, a Fund's underlying investments may trade on markets that may or may not be open on the same day as the Fund. Furthermore, a Fund's currency holdings may be valued at a different time than the level of its index. In addition, the Funds with a foreign currency hedging strategy may also be unable to perfectly match the Index and will introduce additional costs, both sources of additional correlation risk. Any of these factors could decrease correlation between the performance of a Fund and the index and may hinder a Fund's ability to meet its investment objective.

· Counterparty Risk

A Fund will be subject to credit risk (i.e., the risk that a counterparty is unwilling or unable to make timely payments or otherwise meet its contractual obligations) with respect to the amount the Fund expects to receive from counterparties to financial instruments (including derivatives and repurchase agreements) entered into by the Fund. The Funds generally structure the agreements such that either party can terminate the contract without penalty prior to the termination date. If a counterparty terminates a contract, a Fund may not be able to invest in other derivatives to achieve the desired exposure, or achieving such exposure may be more expensive. A Fund may be negatively impacted if a counterparty becomes bankrupt or otherwise fails to perform its obligations under such an agreement.

· Industry Concentration Risk

An Index tracked by a Fund may have a significant position of its value in issuers in an industry or group of industries. As such, a Fund would allocate its investments to approximately the same extent as the Index. As a result, a Fund may be subject to greater market fluctuations than a fund that is more broadly invested across industries.

· Geographic Concentration Risk

Certain Funds that focus their investments in companies economically tied to particular foreign countries or geographic regions may be particularly susceptible to political, social, economic or regulatory events affecting those countries or regions. The performance of such Funds may be more volatile than a more geographically diversified fund.

· Foreign Currency Risk

Certain of the Funds' investments may be denominated in foreign currencies. Investments denominated in foreign currencies are exposed to more risk than those investments denominated in U.S. dollars. The value of an investment denominated in a foreign currency could change significantly as foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign currency losses could offset or exceed any potential gains, or add to losses, in the related investments. Regulatory fees or higher custody fees maybe imposed on foreign currency holdings.

· Debt Instrument Risk

Certain Funds invest in, or seek exposure to, debt instruments. Debt instruments may have varying levels of sensitivity to changes in interest rates and other factors. In addition, changes in the credit quality of the issuer of a debt instrument (including a default) can also affect the price of a debt instrument, as can an issuer's default on its payment obligations. These factors may cause the value of an investment in a Fund to change.

Inflation Risk

Inflation risk is the risk that the value of assets or income from a Fund's investments will be worth less in the future as inflation decreases the value of payments at future dates. As inflation increases, the real value of a Fund's portfolio could decline. Inflation rates may change frequently and drastically as a result of various factors and the Fund's investments may not keep pace with inflation, which may result in losses to Fund investors or adversely affect the real value of shareholders' investments in a Fund. Inflation has recently increased and it cannot be predicted whether it may decline.

· Breakeven Inflation Investing Risk

ProShares Inflation Expectations ETF seeks investment results, before fees and expenses, that track the performance of the FTSE 30-Year TIPS (Treasury Rate-Hedged) Index. The FTSE 30-Year TIPS (Treasury Rate-Hedged) Index tracks the performance of long positions in the most recently issued 30-year Treasury Inflation-Protected Securities ("TIPS") bond and duration-adjusted short positions in U.S. Treasury bonds of, in aggregate, approximate equivalent duration dollars to the TIPS. The FTSE 30-Year TIPS (Treasury Rate-Hedged) Index seeks to achieve an overall duration dollar amount of zero. The difference in yield (or spread) between these bonds (Treasury yield minus TIPS yield) is commonly referred to as a "breakeven rate of inflation" ("BEI") and is considered to be a measure of the market's expectations for inflation over the relevant period. The level of the FTSE 30-Year TIPS (Treasury Rate-Hedged) Index (and the Fund) will fluctuate based on changes in the value of the underlying bonds, which will likely not be the same on a percentage basis as changes in the BEI. The FTSE 30-Year TIPS (Treasury Rate-Hedged) Index is not designed to measure or predict the realized rate of inflation, nor does it seek to replicate the returns of any price index or measure of actual consumer price levels. Changes in the BEI are based on the TIPS and U.S. Treasury markets, interest rate and inflation expectations, and fiscal and monetary policy. There is no guarantee that these factors will combine to produce any particular directional changes in the FTSE 30-Year TIPS (Treasury Rate-Hedged) Index over time, or that the Fund will retain any appreciation in value over extended periods of time, or that the returns of the FTSE 30-Year TIPS (Treasury Rate-Hedged) Index or the Fund will track or outpace the realized rate of inflation, or any price index or measure of actual consumer price levels. It is possible that the returns of the FTSE 30-Year TIPS (Treasury Rate-Hedged) Index or the Fund will not correlate to (or may be the opposite of) the change in the realized rate of inflation, or any price index, or measure of actual consumer price levels. Furthermore, while the BEI provides exposure to inflation expectations, it may also be influenced by other factors, including premiums related to liquidity for certain bonds as well as premiums surrounding the uncertainty of future inflation. These other factors may impact the level of the FTSE 30-Year TIPS (Treasury Rate-Hedged) Index or the value of the Fund in unexpected ways and may cancel out or even reverse the impact of changes in inflation expectations. As a result, an investment in the Fund may not serve as an effective hedge against inflation.

Subsidiary Investment Risk

Changes in the laws of the United States and/or the Cayman Islands, under which the ProShares K-1 Free Crude Oil ETF and its Subsidiary are organized, respectively, could result in the inability of the Funds to operate as intended and could negatively affect the Fund's and its shareholders. The Fund complies with the provisions of the 1940 Act governing investment policies, capital structure and leverage on an aggregate basis with its Subsidiary.

· Risks Associated with the Use of Crude Oil Futures Contracts

ProShares K-1 Free Crude Oil ETF obtains investment exposure through commodity futures and does not invest directly in physical commodities. ProShares K-1 Free Crude Oil ETF does not invest in nor seek exposure to the current "spot" or cash price of physical crude oil. Crude oil futures contracts typically perform very differently from, and commonly underperform, the spot price of crude oil due to current (and futures expectations of) factors such as storage costs, supply and demand and geopolitical risks. Investing in futures contracts may be considered aggressive and may expose the Fund to greater risks than investing directly in securities or other instruments. These risks include counterparty risk and liquidity risk (each as discussed below). Because futures contracts often require limited initial investment, the use of futures contracts also may expose the Fund to losses in excess of those amounts initially invested.

Commodity Market Risk

The value of Commodity Futures typically is based in great part upon the price movements of a physical commodity and the market's expectations for such moves in the future. The prices of Commodity Futures may fluctuate quickly and dramatically and may not correlate to price movements in other asset classes. Global events such as government interventions, treaties and trading, inter- or intrastate conflict, weather or other natural disasters, changes in supply or production, changes in activity of crude oil commodity producing companies, countries and/or organizations, and changes in speculators' and/or investor's demand can cause extreme levels of volatility. Furthermore, since commodities are generally denominated in USD, a strengthening US dollar can also cause significant declines in commodity prices. An active trading market may not exist for certain commodities. Each of these factors and events could have a significant negative impact on a Fund.

Rolling Futures Contract Risk

ProShares K-1 Free Crude Oil ETF (through its investment in the Subsidiary) has exposure to futures contracts and is subject to risks related to "rolling" of such contracts. The Fund does not intend to hold futures contracts through their expiration date, but instead intends to "roll" its futures positions. Rolling occurs when a Fund closes out of futures contracts as they near their expiration date and is replaced with contracts that have a later expiration date. When the market for these futures contracts is such that the prices are higher in the more distant delivery months than in the nearer delivery months, the sale during the course of the rolling process of the more nearby contract would take place at a price that is lower than the price of the more distant contract. This pattern of higher futures contracts is such that the prices are higher in the nearer months than in the more distant months, the sale during the course of the rolling process of the more nearby contract would take place at a price that is higher than the price of the more distant contract. This pattern of higher futures prices for shorter expiration futures contracts is referred to as "backwardation." Extended periods of contango or backwardation have occurred in the past and can in the future cause significant losses for a Fund.

· Risks Specific to the Crude Oil Markets

Several factors may affect the price of crude oil and, in turn, the WTI crude oil futures contracts and other assets, if any, owned by the Fund. These factors include, but are not limited to, significant increases or decreases in the available supply or demand of crude oil, storage costs, technological factors related to new or improved extraction, refining and processing equipment and/or methods, a significant change in the attitude of speculators and investors towards crude oil, large purchases or sales of crude oil by governments or large institutions, other political factors such as new regulations or political discord in oil producing countries, as well as a significant increase or decrease in crude oil hedging activity by crude oil producers. Contemporaneous with the onset of the COVID-19 pandemic in the U.S., crude oil markets experienced shocks to the supply of and demand for crude oil. This led to an oversupply of crude oil, which impacted the price of crude oil and futures contracts on crude oil and caused historic volatility in the market for crude oil and crude oil futures contracts. In April 2020, these market conditions contributed to a period of "extraordinary contango" that resulted in a negative price in the May 2020 WTI crude oil futures contract. If all or a significant portion of the futures contracts held by the Fund at a future date were to reach a negative price, investors in the Fund could lose their entire investment.

On February 24, 2022, Russia commenced a military attack on Ukraine. The outbreak of hostilities between the two countries could result in more widespread conflict and could have a severe adverse effect on the region and the markets for securities and commodities, including oil. In addition, sanctions imposed on Russia by the United States and other countries, and any sanctions imposed in the future could have a significant adverse impact on the Russian economy and related markets. The price and liquidity of the futures in which the Fund invests may fluctuate widely as a result of the conflict and related events. How long such conflict and related events will last and whether it will escalate further cannot be predicted. Impacts from the conflict and related events could have significant impact on the Fund's performance, and the value of an investment in the Fund may decline significantly.

Exposure to Retailing Industry Risk

Retailing Industry Risk is the risk faced by companies in the retailing industry, including: changes in domestic and international economies, consumer confidence, disposable household income and spending, and consumer tastes and preferences; intense competition; changing demographics; marketing and public perception; dependence on third-party suppliers and distribution systems; intellectual property infringement; legislative or regulatory changes and increased government supervision; thin capitalization; dependence on a relatively few number of high volume sales days to achieve overall results; and dependence on outside financing, which may be difficult to obtain.

Online Retail Companies Risk

Companies that operate in the online marketplace and retail segments are subject to fluctuating consumer demand. Unlike traditional brick and mortar retailers, online marketplaces and retailers must assume shipping costs or pass such costs to consumers. Consumer access to price information for the same or similar products may cause companies that operate in the online marketplace and retail segments to reduce profit margins in order to compete. Due to the nature of their business models, companies that operate in the online marketplace and retail segments may also be subject to heightened cybersecurity risk, including the risk of theft or damage to vital hardware, software and information systems. The loss or public dissemination of sensitive customer information or other proprietary data may negatively affect the financial performance of such companies to a greater extent than traditional brick and mortar retailers. As a result of such companies being web-based and the fact that they process, store, and transmit large amounts of data, including personal information, for their customers, failure to prevent or mitigate data loss or other security breaches, including breaches of vendors' technology and systems, could expose companies that operate in the online marketplace and retail segments or their customers to a risk of loss or misuse of such information, adversely affect their operating results, result in litigation or potential liability, and otherwise harm

their businesses. Investing in Online Retailers may be attractive to investors who believe the trend of rising online sales will continue; however, there is no guarantee this trend will continue. Each of these factors could have a negative impact on the performance of the companies in the Index and the performance of the Fund.

· Metaverse Companies Risk

The metaverse is a developing technology and is subject to risks associated with a developing technology which include, but are not limited to, small or limited markets for their securities, changes in business cycles, world economic growth, technological progress, rapid obsolescence, and government regulation. Companies in metaverse-related businesses, especially smaller, start-up companies, tend to be more volatile than securities of companies that do not rely heavily on technology. Rapid change to technologies that affect a company's products could have a material adverse effect on such company's operating results. These companies may rely on a combination of patents, copyrights, trademarks and trade secret laws to establish and protect their proprietary rights in their products and technologies. Such companies typically face intense competition and loss or impairment of intellectual property rights. There is no guarantee that the products or services produced by companies in metaverse related businesses will be successful.

Media and Entertainment Industry Risk

Media and entertainment companies within the Communication Services industry are impacted by the high costs of research and development of new content and services in an effort to stay relevant in a highly competitive industry. In addition, media and entertainment companies are challenged by the changing tastes, topical interests and discretionary income of their targeted consumers. With the advancement of streaming technology, sales of content through physical formats (such as DVD and Blu-ray) and traditional content delivery services (such as cable TV providers and satellite dish operators) are declining in popularity as consumers increasingly opt to purchase digital content that is customizable, less expensive and takes up less physical space. The media and entertainment industry is regulated and changes to rules regarding advertising and the content produced by media and entertainment companies can increase overall production and distribution costs.

• Semiconductors and Semiconductor Equipment Industry Risk

The risks of investments in the industry include: intense competition, both domestically and internationally, including competition from subsidized foreign competitors with lower production costs; wide fluctuations in securities prices due to risks of rapid obsolescence of products; economic performance of the customers of semiconductor companies; their research costs and the risks that their products may not prove commercially successful; capital equipment expenditures that could be substantial and suffer from rapid obsolescence; and thin capitalization and limited product lines, markets, financial resources or personnel. The semiconductors sector may also be affected by risks that affect the broader technology sector, including: government regulation; dramatic and often unpredictable changes in growth rates and competition for qualified personnel; heavy dependence on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability; and a small number of companies representing a large portion of the technology sector as a whole.

Software and Services Industry Risk

The risks of investments in the industry include: competitive pressures, such as aggressive pricing (including fixed-rate pricing), technological developments (including product-specific technological change), changing domestic demand, and the ability to attract and retain skilled employees; availability and price of components; dependence on intellectual property rights, and potential loss or impairment of those rights; research and development costs; rapid product obsolescence; cyclical market patterns; evolving industry standards; and frequent new product introductions requiring timely and successful introduction of new products and the ability to service such products. The software and services industry may also be affected by risks that affect the broader information technology industry.

Battery Metals Investing Risk

Companies engaged in the battery metals mining industry are subject to the risks associated with mining activities. These risks include those related to changes in the price of battery metals, which may be the result of changing inflation expectations, currency fluctuations, speculation, and industrial, government and global consumer demand, among other factors. In addition, such companies may be particularly susceptible to disruptions in the supply chains and world events and economic conditions, including political risks of the countries where battery metals companies are located or do business. These companies may also face increased scrutiny from regulators and legislators considering the environmental impact of battery metal mining. Finally, mining companies often engage in significant amounts of spending on exploration and development of mineral deposits which may involve significant financial risks over longer periods of time.

Unrelated Business Lines Risk

Companies in the Index may have significant business lines that are unrelated to the index theme. These unrelated business lines may be a meaningful portion of a company's current business, in terms of profit or revenue, for example, than the portion represented by the Index theme. Consequently, these unrelated business lines may have a significant impact on the

performance of the company, the Index and the Fund. In particular, these unrelated business lines may cause the Fund to underperform investments that do not have exposure to unrelated business lines. For example, if an unrelated business line of a company underperforms its battery metals related business line, it may negatively affect the performance of the company, the Index and the Fund.

Natural Disaster/Epidemic Risk

Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics (for example, the novel coronavirus COVID-19), have been and can be highly disruptive to economies and markets and have recently led, and may continue to lead, to increased market volatility and significant market losses. Such natural disaster and health crises could exacerbate political, social, and economic risks, and result in significant breakdowns, delays, shutdowns, social isolation, and other disruptions to important global, local and regional supply chains affected, with potential corresponding results on the operating performance of the Funds and their investments. A climate of uncertainty and panic, including the contagion of infectious viruses or diseases, may adversely affect global, regional, and local economies and reduce the availability of potential investment opportunities, and increases the difficulty of performing due diligence and modeling market conditions, potentially reducing the accuracy of financial projections. Under these circumstances, the Fund may have difficulty achieving its investment objectives which may adversely impact Fund performance. Further, such events can be highly disruptive to economies and markets, significantly disrupt the operations of individual companies (including, but not limited to, the Fund's investment advisor, third party service providers and counterparties), sectors, industries, markets, securities and commodity exchanges, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Funds' investments. These factors can cause substantial market volatility, exchange trading suspensions and closures, changes in the availability of and the margin requirements for certain instruments, and can impact the ability of the Fund to complete redemptions and otherwise affect Fund performance and Fund trading in the secondary market. A widespread crisis would also affect the global economy in ways that cannot necessarily be foreseen. How long such events will last and whether they will continue or recur cannot be predicted. Impacts from these could have a significant impact on a Fund's performance, resulting in losses to your investment.

Risk of Global Economic Shock

Widespread disease, including public health disruptions, pandemics and epidemics (for example, COVID-19 including its variants), have been and may continue to be highly disruptive to economies and markets. Health crises could exacerbate political, social, and economic risks, and result in breakdowns, delays, shutdowns, social isolation, civil unrest, periods of high unemployment, shortages in and disruptions to the medical care and consumer goods and services industries, and other disruptions to important global, local and regional supply chains, with potential corresponding results on the performance of a Fund and its investments.

Additionally, war, military conflicts, sanctions, acts of terrorism, sustained elevated inflation, supply chain issues or other events could have a significant negative impact on global financial markets and economies. Russia's military incursions in Ukraine have led to, and may lead to additional sanctions being levied by the United States, European Union and other countries against Russia. The ongoing hostilities between the two countries could result in additional widespread conflict and could have a severe adverse effect on the region and certain markets. Sanctions on Russian exports could have a significant adverse impact on the Russian economy and related markets and could affect the value of a Fund's investments, even beyond any direct exposure a Fund may have to the region or to adjoining geographic regions. The extent and duration of the military action, sanctions and resulting market disruptions are impossible to predict, but could have a severe adverse effect on the region, including significant negative impacts on the economy and the markets for certain securities and commodities, such as oil and natural gas. Furthermore, the possibility of a prolonged conflict between Hamas and Israel, and the potential expansion of the conflict in the surrounding areas and the involvement of other nations in such conflict, such as the Houthi movement's attacks on marine vessels in the Red Sea, could further destabilize the Middle East region and introduce new uncertainties in global markets, including the oil and natural gas markets. How long such tensions and related events will last cannot be predicted. These tensions and any related events could have significant impact on a Fund performance and the value of an investment in a Fund.

· Trade Disputes

Global economies are interdependent and may be adversely affected by trade disputes with key trading partners and escalating tariffs imposed on goods and services produced by such countries. To the extent a country engages in retaliatory tariffs, a company that relies on imported parts to produce its own goods may experience increased costs of production or reduced profitability, which may affect consumers, investors and the domestic economy. Trade disputes and retaliatory actions may include embargoes and other trade limitations, which may trigger a significant reduction in international trade and impact the global economy. Trade disputes may also lead to increased currency exchange rate volatility, which can adversely affect

the prices of the Fund securities valued in U.S. dollars. Trade disputes could also negatively affect investor confidence in the markets generally and investment growth and could contribute to volatility or overall declines in the U.S. and global investment markets.

· Risks of Government Regulation

The Financial Industry Regulatory Authority ("FINRA") issued a notice on March 8, 2022 seeking comment on measures that could prevent or restrict investors from buying a broad range of public securities designated as "complex products"—which could include the leveraged and inverse funds offered by ProShare Advisors. The ultimate impact, if any, of these measures remains unclear. However, if regulations are adopted, they could, among other things, prevent or restrict investors' ability to buy the funds.

16. Indemnifications

Under the Trust's organizational documents, its officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, in the normal course of business the Trust enters into contracts that contain a variety of general indemnifications. The Trust's maximum exposure under these arrangements cannot be known; however, the Trust expects risk of significant loss to be remote.

17. New Accounting Pronouncements

In December 2023, FASB issued Accounting Standards Update ("ASU") 2023-09 ("ASU 2023-09") Improvements to Income Tax Disclosures, which enhances income tax disclosures, including providing specific categories in the rate reconciliation and income taxes paid. ASU 2023-09 is effective for fiscal years beginning after December 15, 2024; early adoption is permitted. Management is currently evaluating the amendment and its impact to the financial statements.

18. Subsequent Events

The Funds have evaluated subsequent events through the issuance of the financial statements and determined that no events have occurred that require disclosure in the financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of ProShares Trust and Shareholders of each of the forty funds listed in the table below

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of portfolio investments, of each of the funds listed in the table below (forty of the funds constituting ProShares Trust, hereafter collectively referred to as the "Funds") as of May 31, 2025, the related statements of operations and of changes in net assets for each of the periods indicated in the table below, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds listed in the table below as of May 31, 2025, the results of each of their operations and the changes in each of their net assets for the periods indicated in the table below, and each of the financial highlights for each of the periods indicated therein, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of May 31, 2025, by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

Columbus, Ohio

July 25, 2025

We have served as the auditor of one or more investment companies in ProFunds and ProShares Trust group since 1997.

Federal Tax Information

Pursuant to Section 853 of the Internal Revenue Code, the Funds may elect to pass through to shareholders the income tax credit for taxes paid to foreign countries. In addition, these funds have derived net income from foreign countries. For the tax year ended October 31, 2024, the following funds had foreign tax credit and foreign source income:

	Foreign	Foreign
<u>Fund</u>	Tax Credit	Source Income
MSCI EAFE Dividend Growers ETF	\$164,038	\$2,264,057
MSCI Emerging Markets Dividend Growers ETF	144,267	193,262
MSCI Europe Dividend Growers ETF	17,590	150,439
On-Demand ETF	1,340	=
S&P Global Core Battery Metals ETF	3,581	38,503
Supply Chain Logistics ETF	4,164	28,170

Funds with Short-Term Capital Gain Designation

For the tax year ended October 31, 2024, the Trust does not have any ordinary distributions paid during the Trust's tax year that are from qualified short-term capital gain. The funds designate up to the maximum amount of Qualified Short-Term Gains.

Funds with Equalization

For the tax year ended October 31, 2024, the following Fund utilized equalization to offset long-term capital gains with the amounts stated below:

<u>Fund</u>	Long-Term
Large Cap Core Plus	\$9,524,327
S&P 500® High Income FTF	\$1,227,221

Proxy Voting Information

A description of the Trust's (1) proxy voting policies, (2) proxy voting procedures and (3) information regarding how the Trust voted any proxies related to portfolio securities for the prior twelve-month period ended June 30, is available by August 31 of each year, without charge, upon request by contacting the Fund directly at 1-866-PRO-5125 or on the Securities and Exchange Commission ("SEC") Website (http://www.sec.gov).

Quarterly Portfolio Holdings Information

The Funds will file their complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-PORT. The Funds' Form N-PORT will be available on the SEC's Website at http://www.sec.gov. The Funds' Form N-PORT may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Premium/Discount Information

Information about the differences between the daily market price on the secondary markets for shares of a Fund and the Fund's net asset value may be found on the website at www.ProShares.com.

Item 8. Changes in and Disagreements with Accountants for Open-End Management Investment Companies.

None.

Item 9. Proxy Disclosures for Open-End Management Investment Companies.

The initial shareholder of ProShares Russell 2000 High Income ETF (on August 29, 2024) approved by written consent (i) the Investment Advisory and Management Agreement between the Registrant and ProShare Advisors LLC with respect to the Fund; (ii) the Rule 12b-1 Distribution Plan with respect to the Fund; and (iii) the Distribution Agreement between the Registrant and SEI Investments Distribution Co. with respect to the Fund, each as previously approved by the Registrant's Board of Trustees with respect to the Fund.

Item 10. Remuneration Paid to Directors, Officers, and Other of Open-End Management Investment Companies.

For the period ended May 31, 2025, the aggregate remuneration the Registrant paid the directors, all members of any advisory board and any officers are included as part of the Financial Statements and Financial Highlights for Open-End Management Investment Companies filed under Item 7 of this Form.

Item 11. Statement Regarding Basis for Approval of Investment Advisory Contract.

None.
