ROM	\$97	0.95%

How Did the Fund Perform Last Year?

Ultra Technology (the "Fund") seeks daily investment results, before fees and expenses, that correspond to two times (2x) the daily performance of the S&P Technology Select Sector Index (the "Index"). The Fund invests in financial instruments that the Advisor believes, in combination, should produce daily returns consistent with the Fund's investment objective. For the year ended May 31, 2025, the Fund had a total return of 5.23% and an average daily statistical correlation of over 0.99 to twice that of the return of the Index. For the same period, the Index had a total return of 10.84% and a volatility of 30.46%. The Index performance was driven by factors such as strong AI and Tech demand which drove performance during the period. Primary factors affecting Fund performance include the total return of the securities and derivatives held by the Fund, the performance of the reference assets to which any derivatives are linked, financing rates paid or earned, expenses, transaction costs, the volatility of the Fund's Index (and its impact on compounding), and other miscellaneous factors.
