### What were the Fund's costs for the year?

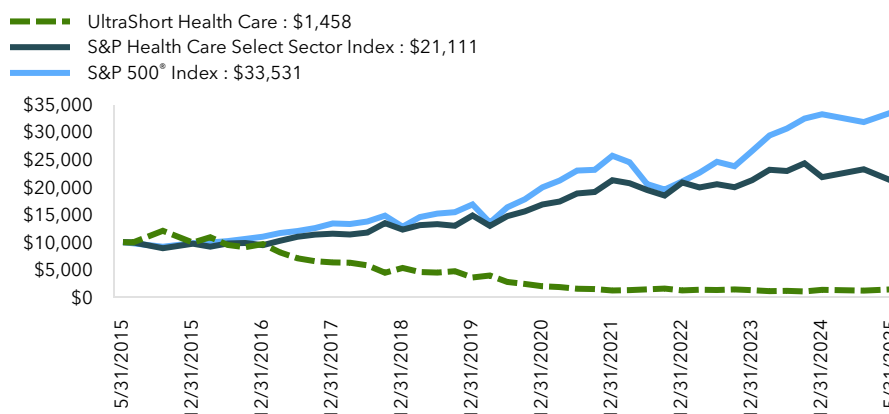

(based on a hypothetical \$10,000 investment)

Ticker	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
RXD	\$104	0.95%

### How Did the Fund Perform Last Year?

UltraShort Health Care (the "Fund") seeks daily investment results, before fees and expenses, that correspond to two times the inverse (-2x) of the daily performance of the S&P Health Care Select Sector Index (the "Index"). The Fund invests in financial instruments that the Advisor believes, in combination, should produce daily returns consistent with the Fund's investment objective. For the year ended May 31, 2025, the Fund had a total return of 19.55% and an average daily statistical correlation of over 0.99 to two times the inverse of the return of the Index. For the same period, the Index had a total return of -6.03% and a volatility of 15.94%. The Index performance was driven by factors such as weakness in the health care sector due in part to policy uncertainty and company specific challenges at United Healthcare. Primary factors affecting Fund performance include the total return of the derivatives held by the Fund, the performance of the reference assets to which any derivatives are linked, financing rates paid or earned, expenses, transaction costs, the volatility of the Fund's Index (and its impact on compounding), and other miscellaneous factors.
