## ProShares S&P Midcap 400 Dividend Aristocrats ETF

### Key Takeaways

**REGL is the only ETF focused exclusively on the high-quality companies of the S&P MidCap 400 Dividend Aristocrats.**

**Strong levels of dividend growth**

REGL's holdings are the S&P MidCap 400 Dividend Aristocrats—companies that have not just paid dividends but grown them for at least 15 consecutive years.

**A legacy of stability and strength**

As a group, REGL's holdings have had stable earnings, solid fundamentals, and often strong histories of profit and growth.

**A demonstrated history of weathering market turbulence**

REGL's strategy has captured most of the gains of rising markets and limited losses in falling markets. In addition, the strategy has outperformed with lower volatility than the S&P MidCap 400—providing a smoother ride over the long term.

### Quality Mid Caps for the Long Term

Investors looking to build a durable equity portfolio with quality companies at its core may want to consider a dividend growth strategy—specifically one that invests in companies with the longest track records of dividend growth. ProShares S&P MidCap 400 Dividend Aristocrats ETF (REGL) is the only ETF focusing exclusively on the S&P MidCap 400® Dividend Aristocrats®—a rare breed of high-quality mid-cap companies that have raised their dividends for at least 15 years.

**54****Companies Qualify**

Twenty-seven percent  
have grown their dividends  
for 32+ years.

### Key Potential Risks

**Market Risk**

Adverse developments in equity markets may cause the value of your investment to decrease.

**Mid-Cap Stocks**

Investments in smaller companies typically exhibit higher volatility.

## How the S&P MidCap 400 Dividend Aristocrats Capture Quality

As a group, REGL's holdings have demonstrated hallmarks of quality, like stable earnings, solid fundamentals, and often strong histories of profit and growth.

## A History of Weathering Market Turbulence

REGL's strategy has captured more of the gain in rising markets and less of the loss in falling markets. Moreover, the S&P MidCap 400 Dividend Aristocrats Index has outperformed the S&P MidCap 400 with lower volatility since its inception in 2015.

Source: Morningstar. "Up capture ratio" measures the performance of a fund or index relative to a benchmark when that benchmark has risen. "Down capture ratio" measures performance during periods when the benchmark has declined. Ratios are calculated by dividing monthly returns for the fund's index by the monthly returns of the primary index during the stated time period and multiplying that factor by 100. Index returns are for illustrative purposes only and do not represent actual fund performance. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

Number of consecutive years of dividend growth is based on dividends paid during the calendar year and is calculated based on best efforts. Constituents are subject to change. If fewer than 40 stocks meet criteria, the index may include companies with shorter dividend growth histories.

## Index Breakdown by Sector as of 3/31/25

## Index Highlights

- **15 years of consecutive dividend growth points to the general strength and stability of the index constituents.**
- **Contains a minimum of 40 stocks.**
- **Equal weighting methodology, unlike market cap weighting:**
  - Treats each company as a distinct investment opportunity without regard to its size.
  - Does not have any single large weighting, so the index is not overly dependent on a few holdings for performance.
- **Well diversified across sectors.**
  - Limits the weight of any single sector to no more than 30% of the total index.
- **Is rebalanced quarterly to equal weights in January, April, July and October, with an annual reconstitution during the January rebalance.**

Companies may reduce or eliminate dividends at any time, and those that do will be dropped from the index at reconstitution.

**Investing involves risk, including the possible loss of principal. This ProShares ETF** is diversified and entails certain risks, including imperfect benchmark correlation and market price variance that may decrease performance. Investments in smaller companies typically exhibit higher volatility. Small- and mid-cap companies may have limited product lines or resources, may be dependent upon a particular market niche and may have greater fluctuations in price than the stocks of larger companies. Small- and mid-cap companies may lack the financial and personnel resources to handle economic or industry-wide setbacks and, as a result, such setbacks could have a greater effect on small- and mid-cap security prices. Please see summary and full prospectuses for a more complete description of risks. **There is no guarantee any ProShares ETF will achieve its investment objective.**
